Personal Planning Power

Home

There are ten myths on investing that are holding you back, and P3 will break you free. P3 will give you personal, planning power.

For instance, did you know that:

- 1) You only need 1% return to break even if you are on track? You really do!
- 2) You only need 3 requests to get you back on track financially?
- 3) There are "right" ways not there, and what Congress tries to pass tend to fix it, that break spending bills and lobby like crazy to stop it? This is not a Republican or Democrat thing both parties have still been money and a Republican "stealing" your money.
- 4) Financial planners and investment brokers do not make money regardless of if you make money or lose money? And that if you make money with them, that actually they take a large percentage of your gains, and if you lose, you lose the same percentage?
- 5) Financial planners and investment brokers do not follow basically a similar process to "help" you invest your money? One that you can follow on your own?
- 6) You do not need to struggle off your own retirement savings, that wealthily managing yourself is a lot easier, and that being all your money to... you can be more than to manage your investment?
- 7) That most financial planners and investment brokers perform worse than 90%?
- 8) That the majority of Americans have only \$25,000 in a savings account?
- 9) That 65% of all Americans have no 401k plans, and of those that do have 401k plans, 65% have about \$75,000 total? Really, not much of a retirement nest egg?
- 10) Most people think that you need to be a financial "pro". Universally people fear money matters and investing. There are fears and myths that still drive and financial planners pay on. There are the same fears that hold back what managing their taxes, that are needed a CPA, that was before Turbo Tax. And we will do for investors what income tax services do for tax payers (and we do all both investors and tax payers).

If you wish to invest well and lack trust of Wall Street, you have come to the right place.

P3

Here is the point, you have found a resource that will help you get your finances to the "right place". Personal Planning Power (P3) was developed as both a financial planning application as well as a consumer guide.

The application capabilities of P3 can help you build accurate portfolios, create a fully qualified plan, and set future wealth and income. For additional information, visit us at www.personalplanningpower.com or call 1-800-888-8888 or 1-800-888-8888.

The guide will help you understand the process of creating a personal financial plan, and how to use it to your advantage. P3 is a free download and when you download P3, in first glance you will notice the financial planning...
